Peripheral Compatibility

- Main strength is using market position as leverage with Vendors to allow driver development for Linux.
- Always investigating new support through Kernel and open source drivers to meet needs first.
- We will use third party to meet any missing needs and work with them to try to improve open source solutions.

Peripheral Support

- Work with vendors to also check configuration, performance and help with debugging issues.
- We are focused on four points in which we are trying to improve Linux support:
 - Printers
 - Bluetooth
 - 3G
 - Digital Cameras

Peripheral Compatability

- Printer Compatability
 - Working currently with Epson for improved compatability.
 - Need support from more vendors like HP and Canon for improved features.
 - Dedicated team to help support vendors to move to Linux and improve drivers.

Peripheral Compatbility

- Bluetooth compatability.
 - Currently working with a closed Bluetooth stack.
 - Working with the vendor to open their stack to improve community support.
 - Looking to move to an open stack but need help to improve the functionality and compatability with devices like cellphones and PDAs.

Peripheral Compatability

- 3G Support.
 - Working with vendors like HuaWei, Option and Alcatel to support both built in a USB modules.
 - Working with the carriers worldwide to allow customers to truly connect anywhere.
 - Working with vendors to improve configuration and support.

Peripheral Support

- Digital Camera Support
 - Thorough testing with many cameras.
 - Feedback via customers.
 - Trying to establish contacts with DSC vendors to improve open drivers and connectivity.
 - Testing to ensure greatest compatibility support.

Peripheral Support

- Other peripherals we are also working on and need help for improved support.
 - External GPS support.
 - Open Source application for location based services.
 - USB DVD Drives.
 - USB DVB/ATSC.
 - Easier support for worldwide support for USB TV tuners and scanning.
 - Other peripheral ideas from community for targeted support.
